<b>Office Action Summary</b>	<b>Application No.</b> 10/576,524	<b>Applicant(s)</b> SCHWOERER, ARTUR	
	<b>Examiner</b> Anita M. King	<b>Art Unit</b> 3632	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

This is the first office action for application number 10/576,524, Lowering Device Comprising a Support Structure, filed on April 20, 2006.

***Information Disclosure Statement***

The information disclosure statement filed April 20, 2006 fails to comply with 37 CFR 1.98(a)(2), which requires a legible copy of each cited foreign patent document; each non-patent literature publication or that portion which caused it to be listed; and all other information or that portion which caused it to be listed. It has been placed in the application file, but some of the information referred to therein has not been considered.

***Claim Rejections - 35 USC § 112***

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claim 7 is rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention. The claims states in line 3-5, that the plate (17) includes a first vertically extending elongated hole and second vertically extending elongated hole, from the drawings, only one elongated hole is disposed in the plate (17) and thus, it is not certain where the second elongated hole is disposed in plate (17). Also, in lines 14-15 of the claim, it is cited that "second latch part disposed at said plate to partially surround said first end of said second bolt...", in the drawings, specifically Fig. 1, the second bolt (13) is entirely

surrounded by second latch part (20), in fact the second latch part and the second bolt appear to be integrally formed, and thus, it is not understood how the second latch part partially surrounds the second bolt.

***Allowable Subject Matter***

Claims 8-12 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

***Conclusion***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
